DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups I, claim(s) 10-15, drawn to a method of treating diarrhea.

Group II, claim(s) 16-20 and 26-30, drawn to a method of preventing infection and pharmaceutical for carrying out the method.

Group III, claim(s) 21-25, drawn to a food composition.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II, and III are each drawn to different methods and composition. The food composition is not required to carry out Invention I or II nor is the pharmaceutical required to treat diarrhea. Each of the claims require a different mode of industrial applicability and are distinct one from the other. The inventive concepts are different and distinct from each other. Therefore, the groups of claims lack inventive unity.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
